## PROFILE

With over 10 years of experience in designing and developing web and batch solutions using Asp.NET Core, C#, and MS SQL, I have built a strong foundation in software architecture and the design of high-performance systems. I also have extensive experience in team leadership, where I've successfully managed software development processes, mentored teams, and ensured the timely and high-quality delivery of projects. I specialize in developing scalable, data-driven, and reliable solutions, with a proven track record of delivering business-critical applications. As a leader, I've demonstrated strong technical and operational leadership, improving team efficiency and ensuring projects meet their intended goals.
